

FACTORS OF INDUSTRIALIZATION

In groups of 3 you will be studying line graphs, drawings and photographs to understand the factors of industrialization

Use the Industrial Matrix PDF on the class web page to complete the Industrial Statistic Worksheet, using complete sentences, in your groups

- In your groups take out a piece of paper and create an Industrial matrix by putting Industrialization in the center of the page. Then surround the concept with all of the all factors of industrialization (i.e. immigration, telegraph wire, railroad miles, Farm Income etc.)
- Next, create a visual map on the piece of paper using arrows to show the interconnections of the factors, connect at least 3 factor. Your group will need to come up with at least 4 separate of these interconnections word maps on your matrix showing the relationship of the factors to one another. Use different symbols as arrow paths to show distinction between connections. Remember the interconnection arrows can go in one direction or both ways, just need to show the impact the factors have on each other.
- At bottom of page (or backside), write a detailed explanation for all 4 of the interconnections you created your created

Factors of Industrialization

- ▣ Free Write:
 - How interrelated are the factors of industrialization? Cite at least 3 factors of industrialization and describe how they were related during the industrial age and how they could be related today?
