Industrial Revolution

- ❖ A drastic transformation of the processes by which American (and European) society produced goods for human consumption
- ❖ “*Revolution*” because the changes were rapid and dramatic!

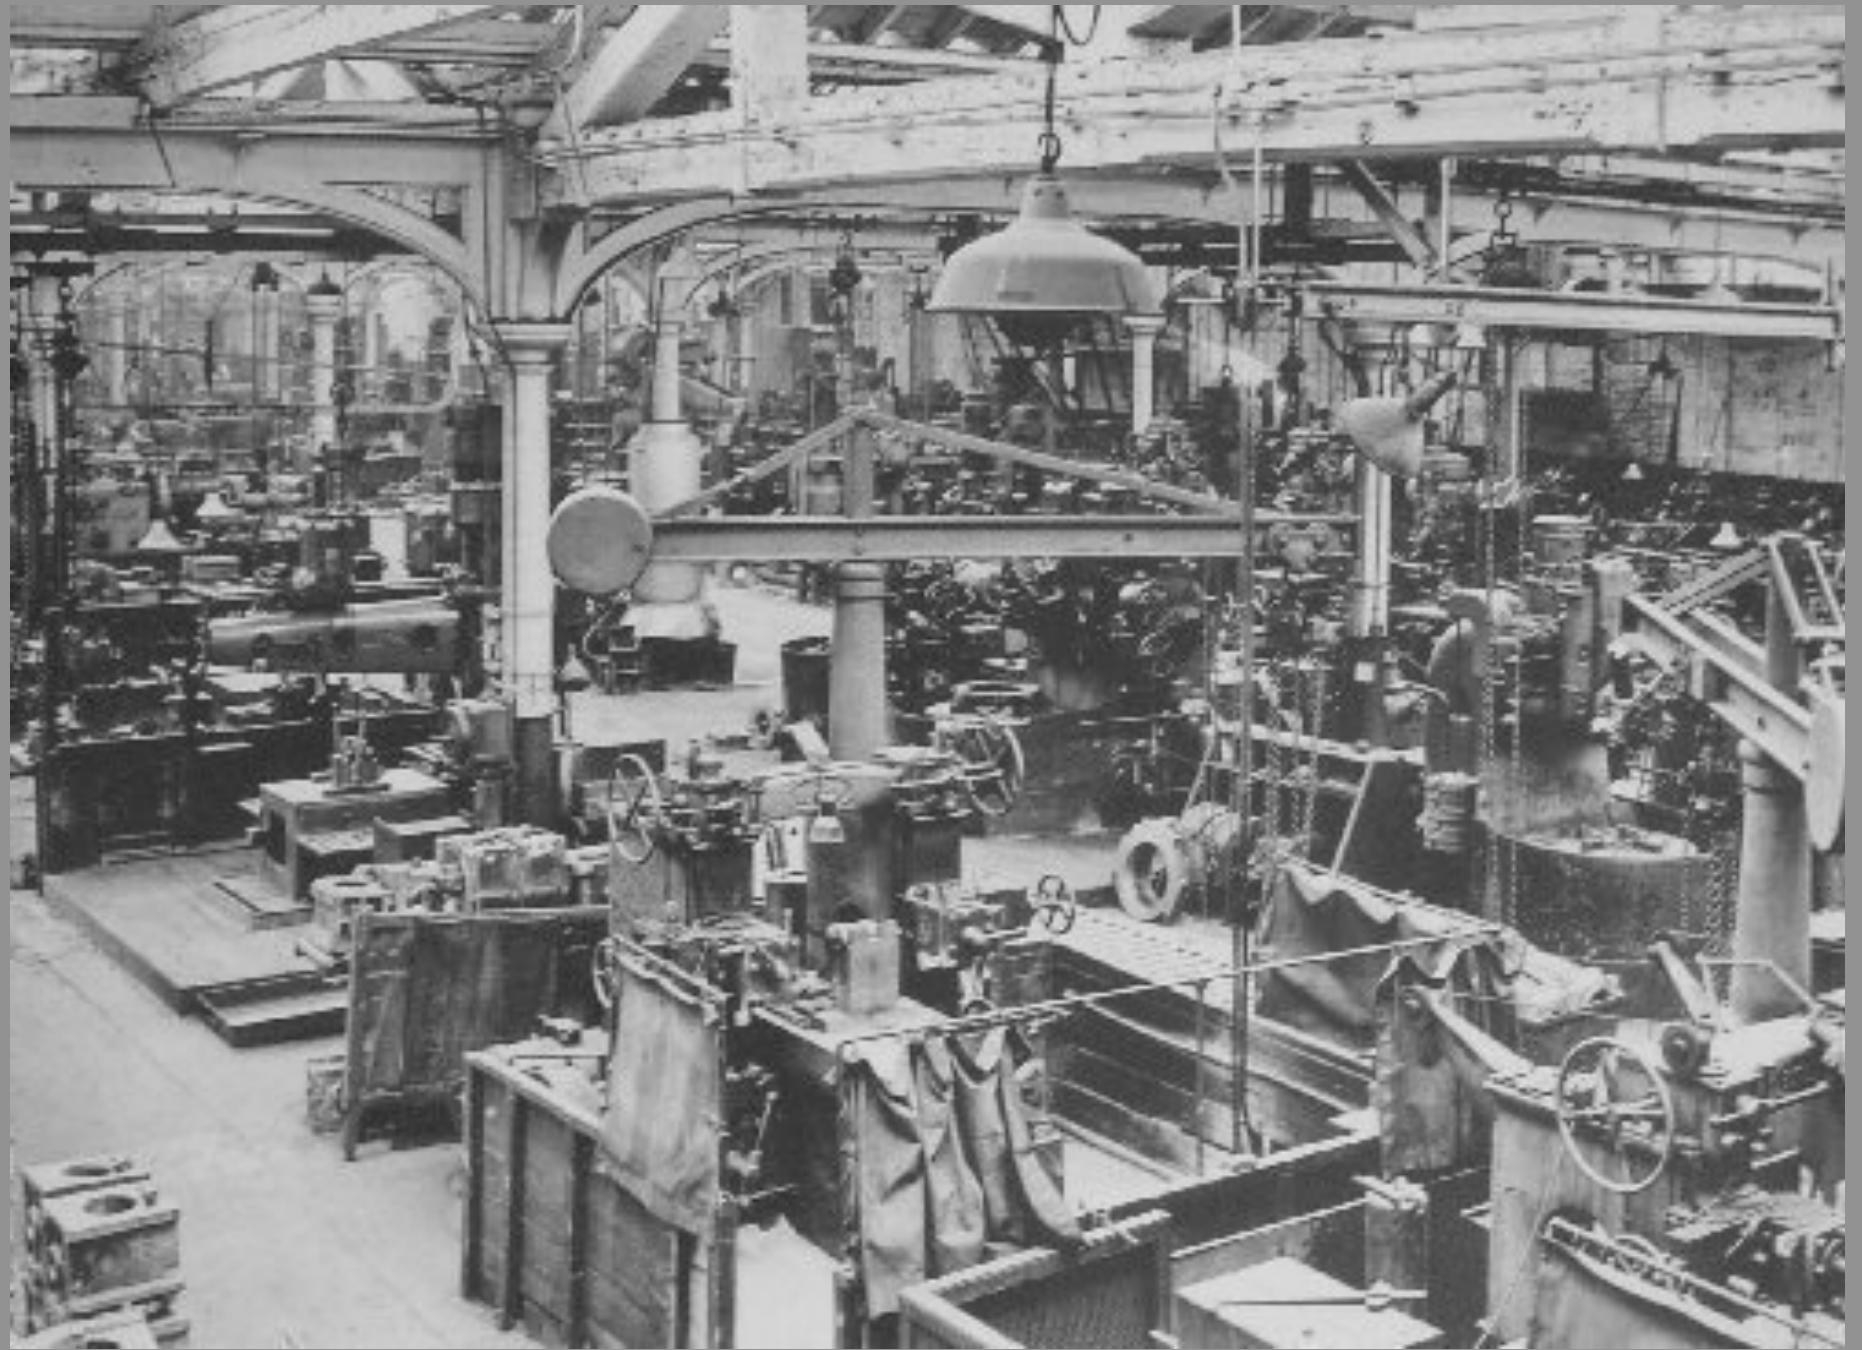

Who Cares About Factories?

- Industrial Revolution is the core or the basis for life in the 21st century
- 100 years radically changed how human beings had existed for the previous 10,000 years
- Major disruption of **social, political** and **economic** ways of life

Industrial Gallery

As each photograph is displayed on the screen, take a moment to think about the following:

1. What is the first thing that draws your attention in the photo?
2. What aspect of industrialization in America is being depicted in the photo? (*What's happening?*)
3. What is one detail you would like to know to understand the photo better?
